

Ecological Information

G 576 Buz[®] Grillmaster ready-to-use

Ready-to-use grill and oven cleaner

Ingredients: <5% anionic surfactants, <5% amphoteric surfactants, <5% nonionic surfactants. Other ingredients: alkalis, auxiliary agents.

Ecolabel	Percentage of readily biodegradable components according to OECD 301 or REGULATION on detergents	Theoretical oxygen demand	Phosphorus content (calculated as elemental phosphorus)
	100.0 %	90 mg / g	1.2 mg / g

Environmental impacts of the product are predominantly due to its alkalinity and its content of surfactants, which are toxic to aquatic organisms. After sewage neutralisation the alkalinity is no longer relevant, while the surfactants, together with the other organic components, are for the most part degraded during the usual dwelling time of sewage in treatment plants. Remnants eventually released into natural waters are immediately subject to further degradation processes and will soon disappear from the environment.
